ST24 Secondary Containment WP	5/31/2022	DEC Approved	Completed
Alternatives Analysis Report	6/30/2022	DEC Review	Ongoing
ST24 Bioremediation IRM Work Plan	9/23/2022	DEC Review	Resubmitted 11/9/22
Pre-Design Investigation Work Plan	11/10/22	DEC Review	NA

Process Area

IRM Work Plans

- Groundwater treatment IRM continues to collect and treat groundwater from the process area.
- Above Ground Tanks: almost complete with the former water treatment tanks. Only four tanks remain in the Light Oil Area.
- Process Equipment Removal: all equipment is down/removed. Continuing to process metal and remove wastes.
- COG Pipes: all above grade piping has been removed with no additional fire incidents.

RI/AAR

- DEC completed first review of revised Remedial Investigation Report, had some additional questions to clarify the response to comments.
- Alternatives Analysis Report is still pending review since resubmission. Anticipate completing review in December 2022.

Superfund Site

Tonawanda Coke, #915055

Investigation Status

Site 108:

- Supplemental Investigation began on October 17, 2022. Test pits and sediment sampling has been completed.
- Monitoring well installation pending driller availability.

Site 109:

- No ongoing activities.

Site 110:

- Supplemental investigation work plan approved October 3, 2022.
- Work to be completed after/in conjunction with Site 108 activities.
